

iSWITCH Intelligent Energy Saver

INTELLIGENT ENERGY SAVERS

Available for Mag Stripe, SmartChip or MiFare Proximity

The Intelligent iSWITCH Energy Saver offers complementary features in order to optimise the performance within any accommodation room.

What makes the iSwitch so intelligent is that it reads the information on the card to ensure that it's a valid card of the specific property operating the power within the room.

After removing the card from the unit, about 10 seconds of courtesy timing operates, allowing the guest to leave the room.

By using an intelligent Energy saver you ensure that only the guest room cards you supply to your guests are used in the locks.

Also available to operate with In Room Technology  ZigBee Alliance
Wireless Control That Simply Works

Voltage:	Between 110 and 220 VAC. Tolerance 10%
Consumption:	Nominal of 10m/amp. Max of 20m/Amp
Frequency:	50-60Hz
Output Relays:	2 Relays. One according to the power supply and the other potentially free Power Cutting: 12A, 250V~, cos = 1 8A, 250v~, cos = 0.6
Size:	Incandescent Max. Load 10A - Halogen Max. Load 10A
Weight:	132mm (H) x 97mm (W) x 35mm (D)
Material:	210grams
Technologies:	Fireproof material (BG3(h)) According to norm UL94 V-0 Magnetic Stripe, SmartChip or MiFare Prox ISO 14443A, ISO14443B & ISO15693
