

Automated Minibars

Bartech is credited as a pioneer in the field of minibar technology, having developed the first ever open-display automated minibar over 20 years ago.

Automated minibars allow for a wide variety of distinct advantages

- **Revenue Enhancement.** Separate trays for impulse purchases
- **Security.** Minibars remain locked until the room is allocated to a guest. Re-stocking requires remote control access.
- **Loss Minimisation.** Product and Revenue losses due to disputes or theft are reduced to $\leq 2\%$ of revenue
- **Costs.** Dramatic reduction in staffing/labour costs as one attendant is able to manage up to 300 rooms per day
- **Stock Control.** Statistical reporting on sales ensures efficient stock re-ordering. Ability to further optimise through product expiry date control and stock rotation alarm
